Shamsia Colony Okara

EDUCATION

GCUF UNIVERSITY SAHIWAL
(2022 - Present)

- Bachelor of Computer Sceince
- Current CGPA (3.30)

PGC OKARA
(2020 - 2022)

- ICS

MC High School Okara
(2018 - 2020)

- Matriculation

SKILLS

- Python
- Machine Learning
- Data Analysis
- Data Mining
- Dashboard Development
- Feature Engineering
- Statistical Analysis
- Trend Analysis
- Data Transformation
- Model Evaluation
- A/B Testing
- Data Visualization
- Query Optimization
- PostgreSQL
- MS Excel
- Power BI

ABOUT ME

I am Talha, a highly motivated BSCS student at Government College University Faisalabad with strong interest in **Data Analysis** and **Machine Learning**. Skilled in data cleaning, analysis, and visualization using Python libraries such as Pandas, **NumPy**, and **Matplotlib**. Experienced with **Linear Regression**, SQL, PostgreSQL, Excel, and **Power BI** to extract meaningful insights from data. Passionate about **solving problems** and building data-driven solutions while continuously learning modern analytical tools.

EXPERIENCE

Machine Learning & Data Analysis Project (2026-1-3 - PRESENT)

- Built a predictive Linear Regression model to estimate house prices, performing efficient data cleaning, preprocessing, and analysis using Python libraries such as Pandas and NumPy.
- Visualized key trends with Matplotlib and assessed model performance using MAE, MSE, RMSE, and R^2 to ensure accuracy and extract actionable insights from the dataset.

Power BI & Data Analysis Project (2025-2-5 - 2025-8-12)

- Analyze sales datasets to uncover trends, patterns, and performance insights supporting data-driven business decisions.
- Develop interactive Power BI dashboards to visualize KPIs, sales growth, product performance, and regional trends.
- Perform data cleaning and transformation using Excel and Python to ensure accuracy and reliability of analysis

Excel & Data Analysis Project (2025-3-9 - 2026-7-11)

- Analyze hospital management data to uncover patient trends, departmental performance, and operational efficiency insights.
- Develop interactive dashboards to visualize key healthcare metrics, supporting data-driven decision-making and resource managemen

WHY CHOOSE ME

- Skilled in **Python**, SQL, Excel, and **Power BI** with strong ability to transform raw data into actionable insights.
- Solid foundation in **statistical analysis** and machine learning, including **Linear Regression**, for **solving complex data problems**.
- Fast learner with a proactive mindset, focused on leveraging data to deliver **impactful insights** and smarter business decisions.
